WHAT DO I NEED TO KNOW?

Take a breather, February and March are all clear and full speed ahead. Get as much accomplished this year as you can in the first quarter. August Through November we'll see the highest number of planets retrograde, which is typical. Last year seven planets were retrograde at one point and you survived! Remember, we've lived through a lifetime of retrogrades. No need for scary words to be thrown around. This is just simple information I'd like to offer for your own preparation and awareness!

Retrogrades are a great time to take it slow and steady. Think of "Re-" words, you'll most likely be **reviewing, revising, revisit, remind, re-think, re-do, reflect, re-schedule, renovating**, etc. These transits force all of us to go against the flow, look back, make adjustments and finalizations, so we can move forward with a mature level of clarity and confidence. Although sometimes challenging, retrogrades help us to be thorough and to develop a better us!
